

## Precisely Right.

For your corporate success.

Guidelines can lead your company to success – as long as they are managed by the right partner. With its 490 locations in 60 countries, the TÜV Rheinland Group, an independent and widely recognized inspecting and certification body, will help you penetrate the world's most important markets.

# We take your company forward. Through independent inspecting and certification.

For more than 130 years we have been committed to people and businesses all over the world. We started from a steam boiler inspection agency and grew into a leading technical services provider that not only fulfils international standards and performance benchmarks but proactively helps create them. Our success can be measured from the ever-increasing accolades we receive from our customers. Over the last few years the TÜV Rheinland Group has achieved continuous growth – in revenue and income as well as in employee numbers.

Our customers are in the focus of all our thoughts and deeds. It is our aim to continually improve your products, processes and systems and make them safer and more competitive. In doing so our independence guarantees the most credible non-biased results.

Place your trust in our know-how acquired over many years and in our international market knowledge.

Take your company forward – with TÜV Rheinland as your partner. Throughout the world there are more than 13,000 technically and methodologically skilled TÜV Rheinland staff at your disposal.

We will be your partner during the continuous improvement of your products, processes and systems. In doing so we offer more than just safety:

- We inspect buildings, machinery, plants, products, systems and much more.
- We certify successful testing, thereby providing you with a marketing basis for your internal and external communication.
- We will advise and support you throughout your entire innovation development process.
- We promote a view that leads to better quality of life, delivering greater success as well as responsibility towards people and resources.

We can do this for you too.

## Our core competencies:

### **Inspecting.**

By providing you with certified confirmation of the safety and quality of your products and plants – and identifying any deficiencies at an early stage – we contribute to the continuous improvement of your performance.

### **Advising.**

Working as your partner, we will give you the support you need and open up new perspectives in terms of quality and safety. We will provide you with well-founded, practical assistance based on know-how deriving from our familiarity with your industry and a wealth of experiences.

### **Certifying.**

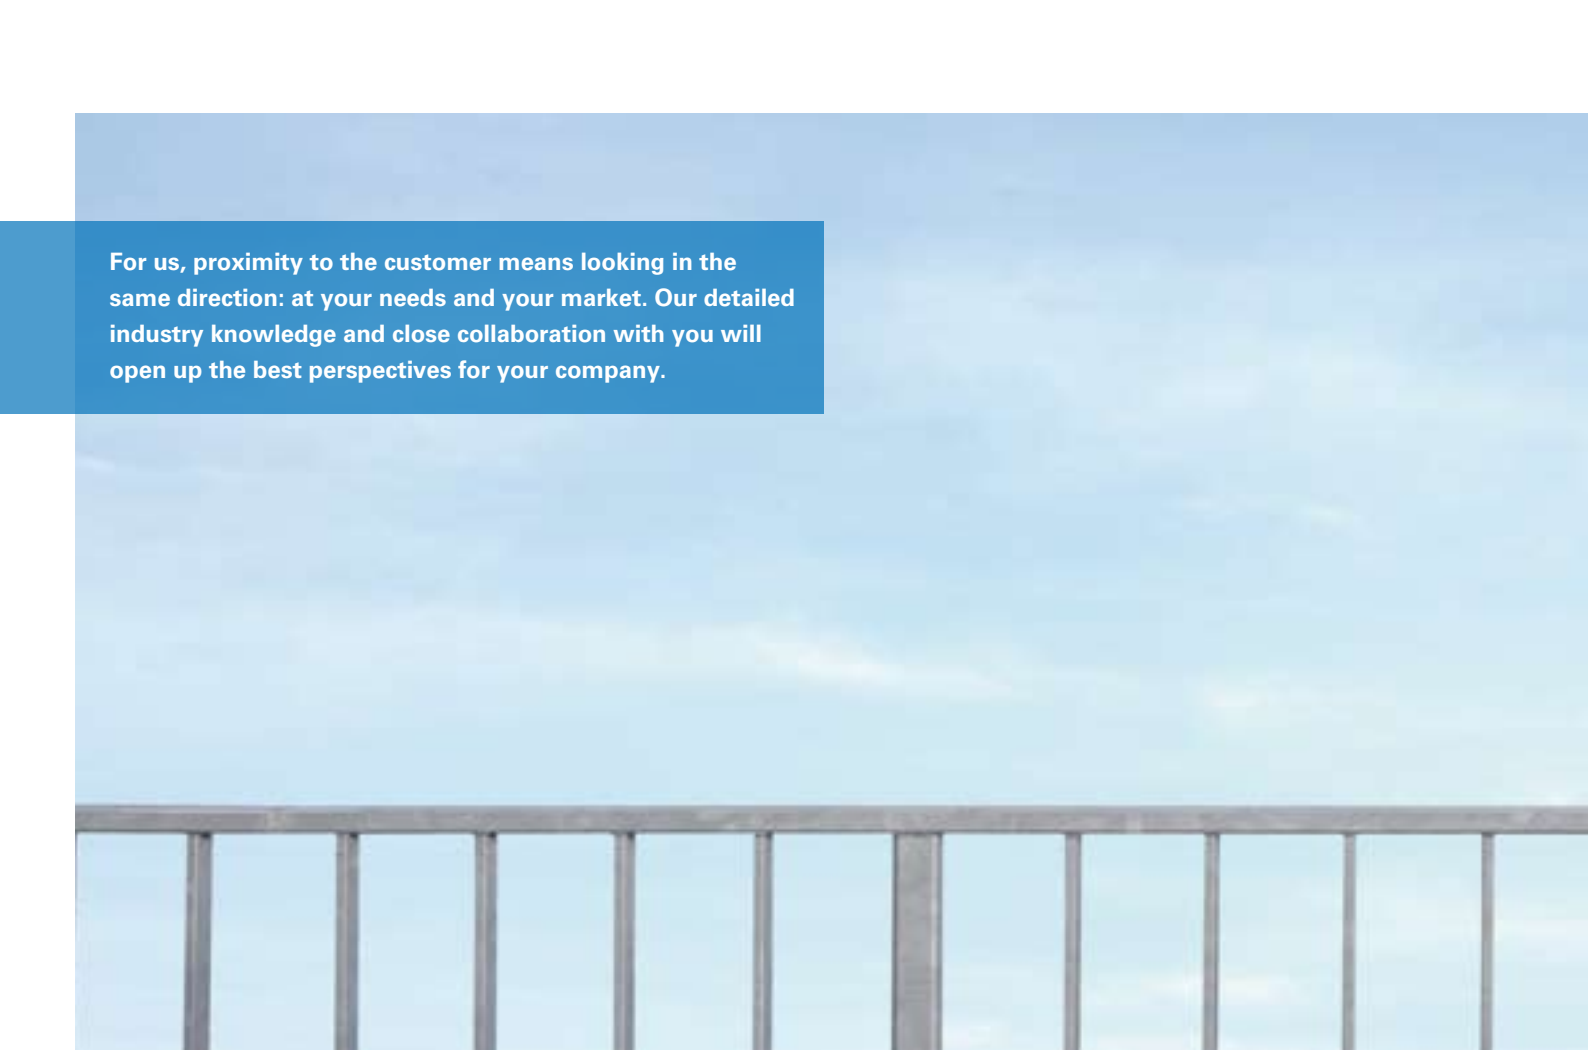

Processes, systems and products to prepare you for the future – with certification that helps you gain access to the market and guarantees your success once you've done so.

### **Developing.**

Together we'll develop new ideas and strategies for your success – covering entire products or project lifecycles.

### **Facilitating.**

With our range of training services we will promote your staff's skills to fully utilize them.

For us, proximity to the customer means looking in the same direction: at your needs and your market. Our detailed industry knowledge and close collaboration with you will open up the best perspectives for your company.

## We take a close look at your requirements. And offer goal-directed solutions.

Thanks to their technical background and experience, our experts are always up to date with market issues and the needs and challenges facing your customers. We'll deliver customer-oriented, professional and, of course, long term solutions to even the most complex of problems. Furthermore, we are on site in order to work out the best solution with you and for you.

We provide a range of services to meet your every need:

TÜV Rheinland offers an extensive service portfolio tailored to the needs of specific industries – from customized solutions and projects all the way to comprehensive full-service packages. From industrial services and mobility via product testing, staff training and system certifications all the way to life care and health concepts. The benefit to you is clear: by placing your trust in a reliable partner, you'll save time and money.

In particular, TÜV Rheinland is able to provide you with methodological and industry-specific expertise thanks to its highly qualified staff. In addition to engineers of all kinds, our medical doctors, chemists, geographers, geologists, mathematicians, psychologists and economists enable us to offer bundled expertise across a wide range of technical areas.

Take advantage of our experience, goal-directed services and proximity to the customer. For the best possible future for your company.

## Your one-stop provider of industry-specific solutions:

- Airports and air traffic
- Automotive manufacturers
- Automotive suppliers
- Banks and insurance companies
- Car servicing, car dealers
- Capital goods industry
- Construction and real estate
- Consumer goods
- E-Business
- Food Industry
- Health
- Institutions/Government
- Leisure
- Logistics
- Media and advertising
- Primary industry
- Railway
- Security service providers
- Telecommunications and IT
- Telematics/Tolls
- Trade
- Utilities and Disposal

## Industrial Services

### For buildings, machinery and plants.

TÜV Rheinland Industrial Services will ensure that your buildings, machinery, plants and other assets are safe, productive and profitable over the long term. Our services will relieve you of the need to perform tasks that take you away from your core business. Full Service for companies – from pressure vessel testing to risk analysis.

**We offer services in the following business fields:**

- Pressure Equipment and Materials Technology
- Elevators, Conveyor and Machinery Technology
- Electrical Engineering and Building Technology
- Industrial Engineering Safety
- Civil Engineering
- Energy and Environmental Technologies
- Project Management and Supervision (currently Brazil only)

## Mobility

### For automotive, railway and aviation industries.

Benefit from a wealth of innovative services for safety on road and rail and in the air. From automobile appraisals to homologation for worldwide type approvals. In addition to our core activity (vehicle and license inspections), TÜV Rheinland also promotes innovation, conducting research in its own Institute of Traffic Telematics aimed at benefiting the future of the mobile society.

**We offer services in the following business fields:**

- Vehicle Inspections, stationary
- Vehicle Inspections, mobile
- Driver's Licenses
- Car Services and Appraisal
- Homologation
- Automotive and Aviation Technology
- Guided Transport Systems
- Traffic Telematics and Consulting, Logistics

## Products

### For quality throughout the entire lifecycle.

From hair dryers to mobile phones: Our specialists test and certify the safety, usability and quality of products in almost every category either for your sales markets or in your supply markets – anywhere in the world. The TÜV Rheinland test mark enables you to make these product advantages visible to your customers. They are also documented on our internet platform TUVdotCOM.

**We offer services in the following business fields:**

- Electrical and Electronic Services
- Mechanical and Machinery Services
- Medical Devices
- EMC and Telecommunication
- Ergonomics and Usability
- Product and Environmental Analyses
- Market Access Services
- LifeCycle Management

## Life Care

### For individuals at work and outside of work.

Health and wellbeing are subjects with which consumers and companies alike will become more and more preoccupied in future. Shaping a positive and productive living and working environment and leading an aware and health-oriented life – this is what our health and life care experts work towards day in, day out. From complex occupational medicine and health management issues all the way to food testing.

**We offer services in the following business fields:**

- Occupational Safety and Health
- Traffic and Occupational Psychology
- Health Management, Healthcare and Wellness
- Medical Center Services
- Food Services

## Education and Consulting

### For work, research and development.

Life is all about learning – in a work context this can mean both professional development and the accomplishment of new challenges in the workplace. The focus of our services in this area is on human potential. Our job is to identify this potential, successfully tap into it and develop it further. We offer individual vocational and advanced training concepts across a wide range of areas including human resources management and quality management.

**We offer services in the following business fields:**

- Professional Education
- Private Schools
- Labor Market Services
- Personnel Management
- Business Consulting
- Publishing and Media
- Research and Development Management

## Systems

### For Management and IT Systems.

Through the certification of management systems and all IT services we help to improve the performance of your business processes. We certify in accordance with recognized international standards (e.g. ISO 9001 – Quality Management, ISO 14001 – Environmental Management and many more.) Give yourself an advantage. We'll display it on the TUVdotCOM website, our internet platform for certified quality and safety.

The TÜV Rheinland STAR<sup>★</sup> rating system provides your investors and customers with security they need.

**We offer services in the following business fields:**

- Certification of Management Systems
- IT and Communications Systems Security
- TUVdotCOM, Web Services
- TÜV Rheinland STAR<sup>★</sup>

# Greater security and quality with TUVdotCOM. An immaculate solution from TÜV Rheinland.

TÜV Rheinland tests and certifies safety and quality in almost every product category – from toys via the latest IT solutions all the way to industrial machinery. But our range of services goes far beyond testing. We also certify processes, systems and – in the context of vocational and advanced training – the qualification level and ability of individuals.

We offer you the opportunity to confirm these results and make them visible to your customers via an individual ID number. To begin with we do this through the well-known TÜV test mark, which immediately announces the safety and tested quality of the product to your customers.

Then another way is by means of TUVdotCOM, the internet platform for tested quality and safety. By entering this ID number on the TUVdotCOM internet platform, your worldwide target group (e.g. manufacturers, dealers or consumers) will be able to

find information on companies, products, processes and systems inspected by TÜV Rheinland. This optimum way of communicating your quality creates transparency for you, your customers and your partners, thereby strengthening the basis for trust. In addition, individually defined access rights allow you to use this innovative internet platform for the purposes of document management and the exchange of protected information with customers and suppliers. And our supplementary “Brand Risk Management” module offers additional protection against product plagiarism.

Use the TUVdotCOM internet platform for a more secure information exchange with customers, suppliers, distribution, marketing and aftersales. We'll be happy to provide you with detailed information on the opportunities available to you – just send your enquiry by e-mail to [preciselyright@tuv.com](mailto:preciselyright@tuv.com).

TUVdotCOM. You make the difference. We show people how.

- More information and transparency engenders trust in your products and services
- Detailed documentation of your quality
- Use of certification for marketing purposes
- Comprehensive after-sales support
- Improved protection against liability risk
- Comprehensive protection against product plagiarism (Brand Risk Management)
- Accelerated time to market through genuine one-stop testing
- Practical online documentation of all certification at all stages of the production chain, including third party certification
- Safe exchange of information with clients and suppliers

A white towel is hanging from a silver metal rack against a blue background. The towel has some dark stains on it. A blue text box is overlaid on the right side of the image.

We can't check every little detail for you without occasionally getting our hands dirty. TÜV Rheinland uses both the latest technology as well as tried and tested manual methods. One way or the other, our work is always impeccable.

# For us, growth also means responsibility. For quality and sustainability worldwide.

You want to achieve your corporate growth targets responsibly and securely?

If so, TÜV Rheinland is the right partner for you. Our focus is on the sustainable development of safety and quality taking into account the various demands of individuals, technology and the environment. Our experts think and act with foresight in your best interest, taking into account new technologies, market developments and current trends.

In order to ensure a sustainable corporate policy and responsible use of resources, we like to lead by example. Among other things we are committed to act in accordance with the 10 principles of the United Nations Global Compact.

The UN Global Compact was initiated by the UN in 1999. Participating companies undertake to behave in an ecologically and socially responsible way – and to provide continual evidence of this. The fundamental principle behind the initiative is that no company should profit from the exploitation of mankind or nature. As one of the first German signatories, TÜV Rheinland actively conforms to the principles of the United Nations Global Compact.

For us this also includes taking responsibility for our own staff, promoting their development and maintaining staff satisfaction at a continually high level.

## The 10 guiding principles of the United Nations Global Compact initiative:

### Leading global companies make a commitment

1. to support and respect the protection of internationally proclaimed human rights,
2. to make sure that they are not complicit in human rights abuses,
3. to uphold the freedom of association and the effective recognition of the right to collective bargaining,
4. to eliminate all forms of forced and compulsory labour
5. to abolish child labour,
6. to eliminate discrimination in respect of employment and occupation,
7. to support a precautionary approach to environmental challenges,
8. to undertake initiatives to promote greater environmental responsibility,
9. to encourage the development and diffusion of environmentally friendly technologies and
10. to work against corruption in all its forms, including extortion and bribery.

A photograph of a well-manicured bonsai tree with a thick, gnarled trunk and a dense canopy of green leaves. The tree is planted in a rectangular, light-colored ceramic pot with a textured, woven pattern on its front. A small, dark heart-shaped logo with the letters 'TR' inside is visible on the trunk. The background is a plain, light blue wall, and the surface below the pot is white and reflective.

Healthy growth needs clear direction. And passion. This combination of quality, sustainability and fitness for the future is close to our heart. This is why we follow the principles of the UN Global Compact and contribute actively to its development via committee work.

To succeed in global markets, you don't need to know all the actors on the stage. Just the right ones – the TÜV Rheinland Group first of all. Our expert knowledge and global presence will help you gain access to all core markets in your industry – anywhere in the world.

# We open doors to the world. In growth markets in 60 countries.

Wherever your market is, we will help you with words and deeds. With 90 foreign companies spread over 490 locations in 60 countries around the globe. The TÜV Rheinland Group is also there for you in the international growth markets of Asia and South America. We are as familiar with the supply markets as we are with the situation in your sales markets and are seasoned experts in the Asian market in particular. Whether you require the supervision of construction projects in Saudi Arabia or product approval in Korea, we will provide you with valuable support and make the crucial contacts for you.

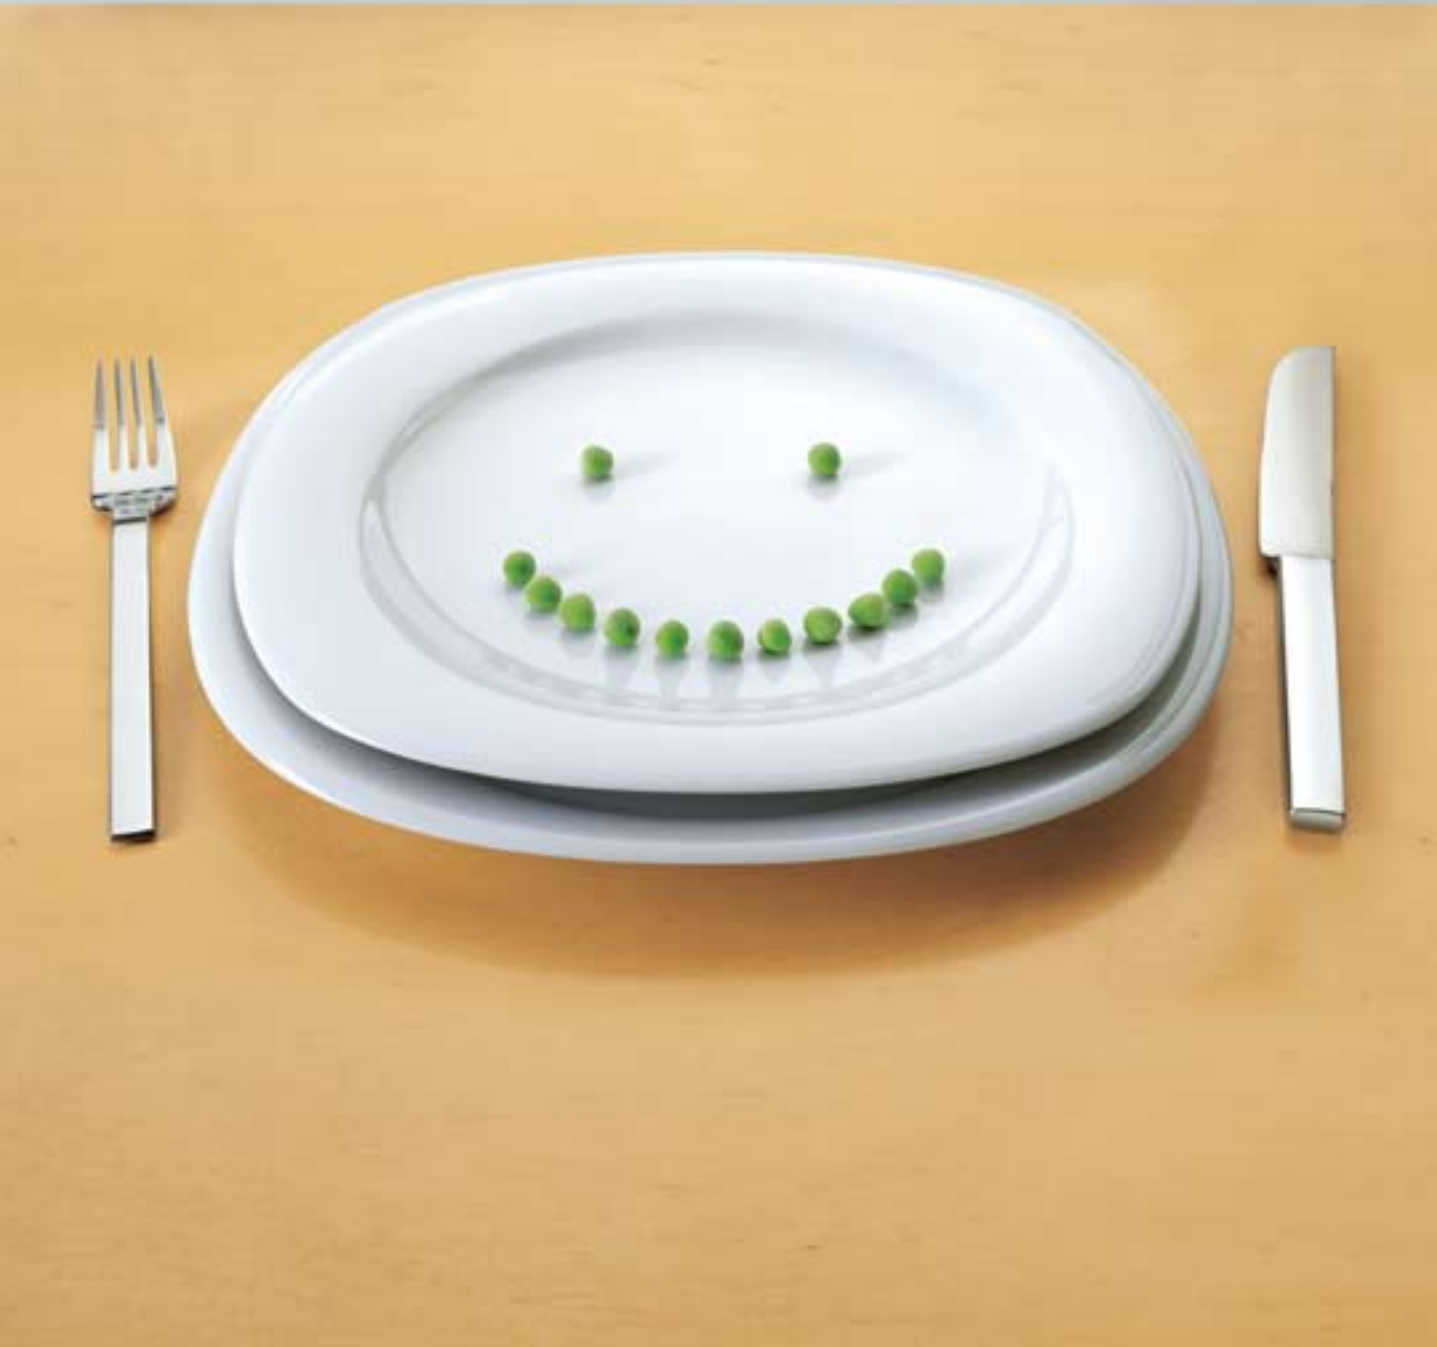

With TÜV Rheinland as your sparring partner, you'll benefit from the advantages of true one-stop shopping and all the synergies of an international network. Specialist subsidiaries such as Ductor S. A. in Brazil or MEEI Kft in Hungary are able to provide supplementary expert knowledge for your global business.

As a global corporation, we are also, of course, an attractive employer of individuals who feel at home in the international arena, offering better than average career development opportunities at home and abroad. Our staff are open-minded and are ideally qualified to perform at their peak. For you.

## TÜV Rheinland Group – worldwide:

- 490 locations in 60 countries and on every continent
- More than 13,000 employees, 6,382 of them in Germany
- More than 2,500 services in 39 Business Fields assigned to 6 Business Streams
- Total revenue of € 1.100 million (2008)
- Pretax earnings: € 71.6 million (2008), profit margin: 6.5 %
- Investments of over € 70 million (2008)
- Founded in 1872

Perfection is our claim and precision is our passion. Commitment and obligation in our day-to-day collaboration can therefore be taken for granted. With us, this is something you can depend on and something to enjoy!
